

# A Project

## CLP

### (Computer Literacy Program)

#### **About us.**

We are "NICT WEB" an institute of computer software & hardware, based in Bodhgaya ([www.nictweb.com](http://www.nictweb.com)). We are providing a quality computer education in locality since 5 yrs and many of our students are now well settled in MNC companies. We are trustworthy institute in Bodhgaya and have been managing few government projects under different NGO around Bodhgaya.

#### **Aim & Vision.**

Our aim & vision are to keep educating and sharing the knowledge of computer technology among poor & needy students. By considering these facts, our team has decided to educate 15 poor students (BPL-Below poverty line) under our "CLP (Computer Literacy Program)" for 2 months without any FEE. CPL is providing free computer education to the peoples in cities as well as in rural areas.

Followings are the full details of CLP : -

At your glance.....

4 Week:-

- A. Ms Word

5 Week:-

- A. Power Point

6 Week. -

- A. Excel

7 Week:-

- A. Internet

8 Week:-

- A. Typing

**Eligibility:** -

For CLP, we are asking students to be under BPL family and 10<sup>th</sup> class pass.

### **Benefit of CLP.**

These computer courses are the best tools for predicting to a large extent what type of results a business plan would throw up. The banks base their sanctioning decision on the soundest possible plan and its financial forecast. Without computers one would have to work very hard to project the real balance sheet manually.

Electronic mail has spread rapidly to cover the whole globe in less than a decade. Now, the Internet is courting the telephone and today you can speak across the globe at the minimum possible rates and also see one another through web cameras.

Knowing computers is actually synonymous with simplification of life mundane tasks.

Computers being machines, provide highly accurate answers and calculations. Hence, a projected plan, a financial estimate, a profit and loss balance sheet are dependable once they are computed.

A computer literate can use his/her time better ensuring that results roll out faster and better. He/she can analyze accurately the data for any discrepancy or fault and correct it in time.

### **Ratio of Computer literacy:-**

According to some estimates, computer literacy in India is just 6.5%. We still have less than 10% Internet penetration. While radio and television reach is less than 150 million households, the mobile phone outreach is more than 53% of about 330 million households. Recently, in a meeting on digital literacy organized by *Hindustan Times* and Intel, junior communications and information technology minister Sachin Pilot suggested that we should aim at making one adult from each household digitally literate.

### **How to support:**

A little help for this noble and kind project would be an act of kindness. You may sponsor this project by following ways :

1. Need Rs. 10,000/- per month for one center or just sponsor per student for Rs. 600/-.
2. You may sponsor us any computer devices like Keyboards, Mouse, LCD Monitor, CPU, UPS or Laptop.
3. You may sponsor study materials like Computer books , Note copies or Pen
4. You may sponsor us for white board or marker.
